**INFORMATION**

---

The Database Update subscription service is offered to provide you with current, accurate navigation information for your UNS System. The Jeppesen navigation information is compiled from official government sources worldwide and formatted on 3½ inch disks. The database updates are loaded into the UNS System via the Data Transfer Unit (DTU).

**Regions:** The accompanying map shows the ten ARINC areas used to describe coverage. The database region selected determines the geographic coverage.

**Navigation information includes:**

**Airports:** Coverage of airports with runways 4000' and longer. Selected soft-surfaced and gravel runways having GPS or GPS overlay procedures are also included.

**Nav aids:** VHF nav aids including VORs, VOR/DMEs, VORTACs, TACANs, DMEs, ILS/DMEs and NDBs.

**Enroute Wpts:** Enroute waypoints (intersections) for on-airway and off-airway navigation.

**Terminal Wpts:** Named waypoints (intersections) which are part of a SID, STAR or approach procedure. Does not include inner markers (IM), middle markers (MM) or outer markers (OM).

**Updates** The annual subscription service includes thirteen updates shipped on a 28-day cycle. The navigation information is only valid for the 28-day period for which it was produced. Expired disks may be discarded. New update disks are sent from Universal Avionics prior to the effective date of each cycle update.

**NOTAMS** **The end user has the ultimate responsibility to verify the navigation data is current, valid, and appropriate for the intended operation. By using UASC navigation data, the operator agrees to the data quality requirements established by UASC. If an error or inconsistency is discovered, the end-user should notify Jeppesen or Universal Avionics for resolution. In addition, the end user is responsible for checking the latest NOTAMs, Jeppesen NavData Alerts and UASC Navigation Data notices and alerts.**

**Trip Kits** A one-time update for any coverage other than your subscription may be purchased from Universal Avionics, as required. This service is in addition to the regular subscription.

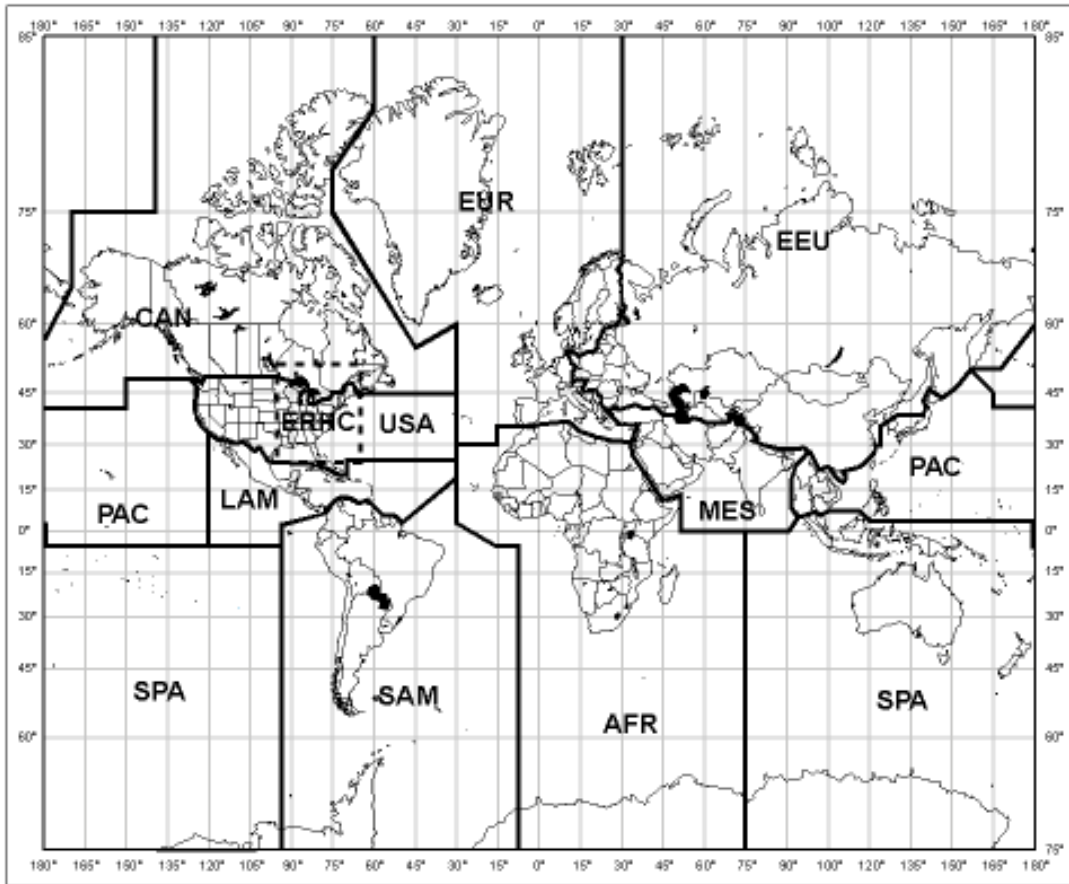

**Discounts** A subscription is required for each aircraft. Multi-aircraft discounts are available for orders of multiple quantities of the same coverage for use by a single organization. For complete information, please contact Universal Avionics Marketing at (520) 295-2300 or (800) 321-5253. The fax number is (520) 295-2394. E-mail is [navdata@uasc.com](mailto:navdata@uasc.com).

To start your update service, please complete the enclosed order form and return it to Universal Avionics via fax at (520) 295-2394 or e-mail to [navdata@uasc.com](mailto:navdata@uasc.com).
