## Navdata Information

---

The Database Update subscription service is offered to provide you with current, accurate navigation information for your UNS System. The Jeppesen navigation information is compiled from official government sources worldwide and formatted on 100MB Zip Disks or 512MB USB Flash Drive. The database updates are loaded into the UNS System via the DTU-100 or SSDTU data transfer unit.

### Navigation information includes:

**Airports:** Public use airports with plain-language references for locations having one hard surfaced runway at least 2,000, 4,000 or 5,000 feet long, depending on the coverage selected. Some soft surfaced and gravel runways with GPS or GPS overlay procedures are also included.

**Nav aids:** VHF nav aids with plain-language references for: VORs, VOR/DMEs, VORTACs, TACANs, DMEs, ILS/DMEs and NDBs.

### Airways and Enroute Waypoints:

All airway routes and enroute waypoints (intersections) published by government agencies for on-airway and off-airway navigation.

### SIDs, STARs and Approaches:

Jeppesen sourced SIDs, STARs, approaches, enroute transitions and missed approach procedures for included airports. Includes ILS, LOC, BC, GPS, VOR DME RNAV, VOR, VOR/DME, NDB and TACAN approaches. Also includes terminal waypoints (intersections) that are part of a SID, STAR or approach. The navdata contains a maximum of 99 SIDs, STARs or approaches at any particular airport. Some private and some special permission required SID, STAR and approach procedures are included. Does not include vector only procedures or LDA approaches, BC/LOC circling approaches, and non-GPS approaches having final approach course changes greater than 6.0 degrees.

**Runways:** Runways for included airports referenced in SIDs, STARs, or approaches. Some private runways, and some soft-surfaced and gravel runways are included.

**Updates** The annual subscription service includes thirteen updates shipped on a 28-day cycle. The navigation information is only valid for the 28-day period for which it was produced. New updates are sent from Universal Avionics prior to the effective date of each cycle update. Return expired media to Universal Avionics for recycling.

**NOTAMs/ALERTS:** NOTAMs and Navdata Alerts are available from Jeppesen at <http://www.jeppesen.com>.

**RTCA/DO-200A** Universal Avionics complies with applicable RTCA/DO-200A and FAA requirements as they apply to navdata for use by end customers in Universal Avionics' flight management systems with software control number 601.x/701.x or later. Universal Avionics publishes the compliance status and information concerning any data problems found during processing or after delivery on the company website at <http://www.uasc.com>.

The navigation databases may contain customer tailored data not originating from a State authority, such as private airports and runways or private arrival or departure procedures. The end user has the responsibility to verify the suitability of this data for the intended operation.

As defined in RTCA/DO-200A, the end user has the ultimate responsibility to ensure the data requirements are met. These responsibilities are satisfied, in part, by obtaining navigation data from an RTCA/DO-200A-compliant supplier such as UASC. By using UASC navigation data, the end user accepts the data quality requirements defined by UASC in the UASC *RTCA/DO-200A Compliance Plan for the Navigation Databases*, a copy of which can be obtained from UASC upon request. **Further, per RTCA/DO-200A, the end user should verify the navigation data is current, valid, and appropriate for the intended operation. The end user also should become familiar with applicable notices to airmen (NOTAMs), Jeppesen NavData Alerts, Navtech FMS Navdata bulletins, NFD alert notifications, and UASC Navigation Data notices and alerts that may affect operation. Finally, the end user should notify UASC if it discovers an error or inconsistency in the data.**

**Discounts** A navdata subscription is required for each aircraft. Contact Universal Avionics Marketing at (520) 295-2300 or (800) 321-5253. Fax: (520) 295-2394. E-mail: [navdata@uasc.com](mailto:navdata@uasc.com).

To start your update service, please complete the enclosed order form and return it to Universal Avionics via fax at (520) 295-2394 or e-mail to [navdata@uasc.com](mailto:navdata@uasc.com).

The Database Update subscription service, provided to support UNS System(s), is comprised of copyrighted data compilations and programs owned by Jeppesen-Sanderson, Inc. Customer agrees that he shall not copy, distribute or use any portion of any said copyrighted subject matter, except in connection with the ordinary and intended use of the UNS System(s) installed in the aircraft identified above. Customer acknowledges and agrees to comply with the explicit condition of sale which allows the corresponding subscription to be used to update only the aircraft as referenced above.

**This subscription is non-refundable.**
